

CURRICULUM VITAE

PERSONAL DETAILS

Name: Jack Whelan
Address: Fonthill Lodge, St. John's Avenue, Clondalkin, Dublin 22.
Date of Birth: 24/09/1997
Mobile Phone: 087 191 4889
E-mail: jackw97@live.ie

EDUCATION

Secondary School

The High School, Zion Road, Rathgar, Dublin 6.

Examinations Completed:

Junior Certificate (June 2013)

Leaving Certificate (June 2016)

Third Level

Dublin Institute of Technology, Kevin Street, Dublin 8.

Currently in my third year studying Computer Science (Infrastructure)

GPA (First Year): 2:1

GPA (Second Year): 2:2

My primary interest is in programming as is reflected in my grades:

Programming: 80%

Object Oriented Programming: 67%

Program Design: 80%

IT Fundamentals: 74%

IT SKILLS

Completed ECDL.

Completed Cisco CCNA 1, 2 and 3. Currently Studying 4.

Competent in the following languages:

- C
- Python
- Java
- HTML
- CSS

Due to my scrap server project I have gained a wider understanding and ability when it comes to Ubuntu systems.

PROJECTS

Scrap Server Room:

I collect all old computer parts wherever I can get my hands on them. I enjoy assembling them at home and installing server software on them to host my web projects and personal files using my home network, so I can access them from anywhere with an internet connection. I currently have 3 functioning Ubuntu servers.

Knight's Riddle:

A sandbox adventure game coded in Java. Currently just an engine, requires some memory optimization and level construction but the core skeleton of functionality is complete.

Civil Right Media

I recently co-founded a media company called Civil Right Media, where we endeavor to deliver reliable and trustworthy news source. Initially just an myself and a friend, we captured the interest of a Greek business man who is now the third co-founder. With this businessman's experience and my friend and I's passion and work ethic, we are confident in the success of our humble startup.

BiblioTech

BiblioTech is the name of a project I have just begun working on, implementing a secure register and login system, a forum, analytics and user profiles.

All of my code-related projects both current and future will be posted here:

WORK EXPERIENCE

Sam's Bar (September 2016 - Present)

I am currently working part time as a floor staff supervisor at Sam's Bar, of the Dawson hotel. When I started at Sam's Bar I was a floor staff myself, after a few months I was promoted to bartender and at the beginning of 2018 I was promoted to floor supervisor. This array of positions has taught me a lot about customer service, managing staff and most of all, learning to love work. My current responsibilities include serving customers at the bar; making sure the floor staff are doing their job properly; making sure the floor staff are taking their breaks and at the end of the night, cleaning the bar and making sure the floor staff clean the customer areas thoroughly.

The Marker Hotel (November 2013 - September 2015, Part-time.)

When I was 15 I had the opportunity to participate in a work experience programme and my initial placement was at The Marker Hotel in Dublin 2. The Marker is a 5 Star Hotel and I gained invaluable training and experience working directly with customers, serving meals and drinks at pre-booked events and also in the Hotel's brasserie. This work placement proved pivotal in my working life as I was offered a part time job at the hotel shortly before my work placement ended. I stopped working at the hotel after 2 years to focus on studying in my Leaving Cert year in school.

INTERESTS

I'm passionate about computer science and enjoy programming and making web templates in my free time. I love building and modifying computers and during first year I began building servers from old unwanted parts to host my own websites and personal files at home.

I currently work in a nice bar/club and thoroughly enjoy the atmosphere; work is something I look forward to. I love working with customers and showcasing my cocktail making skills to people at the bar.

My other interests include watching professional gaming (esports), playing guitar and watching competitive fighting (UFC and boxing). I do enjoy social/competitive gaming myself but it's very difficult to find the free time due to recent projects I have taken on top of my studies.
